

4934 ALL-PURPOSE HYDRAULIC OIL

CUSTOM COMPOST, INC. Milton, NY

580 Case Backhoe • SIC 1794 Excavation Work

CUSTOMER TESTIMONIAL

4934 - Strong anti-wear properties and superior thermal stability

CUSTOMER PROFILE

Custom Compost, Inc. grinds leaves, vegetation and tree stumps in a tub grinder, they then pile it up in rows to decompose. The product is then mixed with sand to make topsoil. They serve the lower Hudson Valley area of New York. They have been using LE products since 1998.

APPLICATION

They use a 580 Case Backhoe to run various jobs.

AREA OF INTEREST

While using a commercial grade hydraulic oil, the machines would slow down by midday. The hydraulic systems failed to produce power to do the work after the backhoe warmed up. It was to the point that the backhoe slowed down so much that they could only run it half a day.

LE SOLUTION

LE's 4934 All Purpose Hydraulic Oil was recommended because of its

strong anti-wear properties and superior thermal stability. LE's 4934 is also recommended for hydraulic systems in a highly contaminated environment, or where high lubricant consumption is a concern.

CUSTOMER COST SAVINGS

Mechanic, Willy Thiels installed 4934 in their backhoe. He was then able to work a full 8-hour day, day after day, and the backhoe never slowed down. The oil performed better than he thought possible.

OTHER PRODUCTS USED

- 1250 ALMASOL® High Temperature Lubricant is used as a general lubricant for everything.
- 4622 MONOLEC® Multiplex Lubricant is used in the screen bearings. It greatly improved winter pumpability and performs very well in high temperatures as well. Willy Thiels feels that it is an excellent grease for their equipment.

We would like to thank the Owner, Joe Felango, Mechanic and Operator Willy Thiels, and LE Lubrication Consultant Dave O'Connor (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
