

**CUSTOMER TESTIMONIAL**

## 6601 LOW TOX<sup>®</sup> HYDRAULIC OIL

LANIER PARK REGIONAL HOSPITAL, Gainesville, GA

Hydraulic Lifts • SIC 8062 General Medical & Surgical Hospitals

**LE's LOW TOX Hydraulic Oils offer superior  
PERFORMANCE IN LUBRICATION, WITH LONG OIL LIFE AND EXCELLENT WEAR PROTECTION**

### **CUSTOMER PROFILE**

Lanier Park Regional Hospital serves Gainesville, Georgia and the surrounding areas.

### **APPLICATION**

There are a number of hydraulic lifts on the many hospital beds and surgical tables in the hospital.

### **AREA OF INTEREST**

The OEM for these hydraulic lifts recommends ISO 32 oil.

### **LE SOLUTION**

LE's 6601 LOW TOX Hydraulic Oil is recommended on the benefits of using low toxicity hydraulic oil. LE's LOW TOX Hydraulic Oils offer superior performance in lubrication, with long oil life and excellent wear protection. There is no worry of premature

oxidation or failure of the lubricant as there is with most vegetable oil based products. LOW TOX Hydraulic Oils are based on USP quality white mineral oils and specially selected additives to provide a low toxicity product with good biodegradability that does not sacrifice lubrication performance or necessitate shortening of lubricant change intervals.

### **CUSTOMER COST SAVINGS**

Lanier Park Regional Hospital estimates that they saved over \$500 in initial lubricant costs by using LE's 6601. LE's 6601 has been in this application since 1995 and is reported to be working very well.

### **OTHER LE PRODUCTS USED:**

LE's 1275 ALMAPLEX Industrial Lubricant and LE's 6804 MULTILEC Industrial Oil.

We wish to thank Lanier Park Regional Hospital and LE Representative Gary Gerber (pictured) for providing the information to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
