*“It is apparent that with the age of our equipment it is Lubrication Engineers®, Inc. products that have prolonged the life of the equipment and helps us avoid costly repair issues.”*

**CUSTOMER TESTIMONIAL**

**CUSTOMER PROFILE**

United Paper Converting located in Miami, Florida, is a subsidiary of Pedro Ramirez Paper Agency, Inc. This facility is dedicated to the converting of paper and paperboard for the printing industry.

**APPLICATION**

The manufacturing plant incorporates a 109” Cameron brand slitter/rewinder with shear cut blades that can rewind jumbo rolls while making longitudinal slits so as to produce the desired roll widths. United Paper also has one Maxon 67” sheeter and a Hamblet 73” sheeter as well as Polar brand guillotine trimmers. The guillotine trimmers feeds sheeted paper upon an air cushioned table for final uniform trimming of all four sides of the sheet and final placement on skids or in boxes. The plant also uses four Clark 10,000 lb forklifts and a Quincy 10 hp air compressor.

**AREA OF INTEREST**

LE Lubrication Consultant Jon Toth stopped by this facility and was invited by the sales manager, Peter Ramirez, to perform a Lubrication Survey of the plant. Immediately, Jon noticed that none of the numerous chains driving these expensive pieces of equipment were being lubricated.

**LE SOLUTION**

Jon Toth recommended LE's 9102 SYNTEMP® Synthetic Lubricant. LE's 9102 is a unique, heavy duty, high temperature spray lubricant designed for open gears, chains, cables, sealed bearings and slides—or any “tight” area where grease lubrication can be best accomplished by the spray method. Its

superior lubricating qualities reduce wear, friction and heat far more effectively than ordinary greases.

### **CUSTOMER COST SAVINGS**

After utilizing LE's 9102 SYNTEMP® Synthetic Lubricant throughout the facility, it was apparent the equipment operated much smoother and the plant became a much quieter work environment.

Peter Ramirez, United Paper Converting Sales Manager stated, *"It is apparent that with the age of our equipment it is Lubrication Engineers®, Inc. products that have prolonged the life of the equipment and helps us avoid costly repair issues."*

*Lubrication Engineers Inc. would like to thank Sales Manager Peter Ramirez and LE Lubrication Consultant Jon Toth (pictured) for providing the information used to prepare this report.*

### **OTHER PRODUCTS USED**

**1275 ALMAPLEX® Industrial Lubricant**—Versatile bearing lubricant for all industries.

**6110 MONOLEC® Hydraulic Oil**—meets the demands of present day hydraulic systems.

**6404 MONOLEC® R&O Compressor / Turbine Oil**—Long life, versatile, rust and oxidation inhibited, anti-wear premium grade industrial oil.

**9460 MONOLEC® Synthetic Industrial Lubricant**—Pure synthetic oil for calendar roll mill bearings & heavy duty enclosed industrial gearboxes operating under severe conditions.
