

2059 MONOLEX[®]

Penetrating Oil and Lubricant

Acts rapidly to penetrate and dissolve most rust, gum and varnish, freeing "frozen" parts. Leaves a tough film of lubricant and acts as a rust & corrosion preventative on metal surfaces

MONOLEX is carefully designed, complex formulation which contains effective ingredients for: *maximum penetration of rust, gum and varnish; lubrication of mating surfaces, even under severe conditions; and, long lasting protection* against the further formation of rust and corrosion.

The tough lubricant film is far more effective than ordinary oils. It contains MONOLEC, LE's exclusive wear-reducing additive, which vastly increases film strength without affecting clearances. Forming microscopic "ball bearings," MONOLEC allows opposing surfaces to slide by one another, greatly reducing friction, heat and wear.

USER BENEFITS:

- Lubricates to reduce wear and extend parts life.
- Minimizes breaking of bolts and stripping of threads.
- Prevents rust and corrosion.
- Fast acting ... saves valuable time.
- No waste or mess ... use just the amount required, where needed.
- Handy, portable container easily carried to any location.
- No need to disassemble parts to lubricate.
- Retards corrosion due to salt water and salt spray.
- Contains no harsh caustics or acids.
- Prevents rust and corrosion. Fast acting, quick drying penetrates work their way through layers of rust and varnish speedily to free "frozen" parts. They evaporate completely after doing their job, carrying away moisture and leaving a protective coat on all metal surfaces.
- Contains extreme pressure additives, which activate should extreme pressures cause the lubricant film to be ruptured and metal-to-metal contact occur.
- Contains a water displacing agent which carries away moisture, allowing the lubricant to contact the metal surface directly without trapping corrosion forming moisture.

TYPICAL APPLICATIONS:

For dozens of uses in industrial plants, maintenance shops, marine applications, on the farm, and in countless other operations.

- Loosens corroded nuts, bolts and parts
- Lubricates hard-to-reach areas
- Stops annoying squeaks
- Protects metal against rust and corrosion
- Frees seized pins, linkage, hinges and valves
- Protects tools and other equipment during storage
- Drives out moisture in wet areas
- An excellent light lubricating oil

**SAFE FOR THE ENVIRONMENT:
CONTAINS NO FLUOROCARBONS.**

WHAT IS MONOLEC[®]?

MONOLEC is LE's exclusive wear-reducing additive which has proven its extraordinary performance in thousands of applications. It is an invaluable component in LE's industrial oils, engine oils, and other lubricants bearing the **MONOLEC** tradename.

MONOLEC creates a singular molecular lubricant film on the metal surface, vastly increasing film strength without affecting tolerances. **LE's MONOLEC** allows opposing surfaces to slide by one another with greatly reducing friction, heat and wear.

AVAILABLE IN BOTH AEROSOL CANS AND SIX GALLON CONTAINERS
